# SAFE BALANCE:
INNOVATIVE FALL PREVENTION

SAFE BALANCE

SAFE BALANCE IS AN INNOVATIVE AND CUTTING-EDGE FALL PREVENTION SOFTWARE USED TO GATHER VITAL SUBJECTIVE/PERFORMANCE-BASED MEASURES WHILE INSTANTLY CREATING INTERVENTION PLANS BASED ON THE PATIENT'S SPECIFIC NEEDS.

Grounded in the CDC's STEADI Algorithm, MIPS 155/318 and beyond, Safe Balance utilizes a best practice design centered on seamless integration into healthcare operations, with a primary focus on preventing workflow interruption.

Since 2016, Safe Balance has provided vital fall-prevention solutions to thousands of healthcare providers across the United States ranging from single-practitioners to multi-state healthcare systems, while simultaneously enhancing the delivery of focused interventions to hundreds-of-thousands of patients.
